Abstract

This study investigated the relationship between psychocultural, sociocultural, college knowledge, and citizenship status factors on Latinx high school students' college enrollment. Participants included 307 Latinx ninth-grade students enrolled across four high schools in central Texas that were followed post-high school graduation. Results indicated that only receiving-culture acquisition and college knowledge were statistically significant predictors of college enrollment. Researchers provide implications for counselors and psychologists.

Resumen

Este estudio investigó la relación entre el conocimiento psicocultural y psicocultural universitario y los factores del estado de ciudadanía en estudiantes preparatorianos registrados para estudios universitarios. Participantes incluyeron 307 latinx (os/as) de tercero de secundaria inscritos en cuatro instituciones de educación superior en el centro de Texas, a quienes se les dio seguimiento después de su graduación de secundaria. Resultados indicaron que había dos predictores estadísticamente significativos de admisión universitaria: recibir adquisición cultural, e información universitaria. Investigadores proveyeron implicaciones para consejeros y psicólogos escolares.

Keywords

Latinx college enrollment, college enrollment, undocumented, acculturation, receiving-culture acquisition, heritage-culture retention
