Environmental & Natural Resource Economics

TENTH EDITION

Tom Tietenberg • Lynne Lewis

Environmental Economics provides you with the analytical tools needed to understand why many of the Earth's natural resources are under threat, and what can be done. The aim of the course is to offer an insight in environmental and natural resource economics and a deeper analysis of environmental policy instruments. The Environmental Economics and Natural Resources group (ENR) analyses the relationship between human activities, economic development and the environment. Description. With an MSc degree in Environmental and Natural Resource Economics, you will know how to deal with environmental and natural resource issues. The Master of Science in Environmental and Natural Resource Economics at the University of Groningen prepares students to apply economic tools to evaluate the allocation and utilization of natural resources. Environmental and Natural Resource Economics. ECTS credits. The course starts with a repetition of elementary market pricing with an emphasis on private environmental issues such as pollution, climate change and the conservation of biodiversity are currently in the headlines of economic debate. Governments. Our MSc programmes in Economics will give you the opportunity to equip yourself with the necessary skills and knowledge to pursue a career. The Environmental and Natural Resources Economics MSc offers training in important areas of economics alongside specialised field courses aimed at environmental and natural resource economics. Environmental and Natural Resource Economics is the best-selling text for natural resource economics and environmental economics courses, offering a comprehensive and up-to-date treatment of the subject. The Institute of Natural Resources Economics and Environmental Policy (INREEP) was founded at HSE in 1997. The Institute's research, projects, and expert advice are widely recognized. With the Environmental and Natural Resource Economics major's flexibility, you can design a program of study tailored to your interests. We also perform teaching activities on the economic tools used for theoretical and numerical analysis of environmental- and natural resource issues. Nature and environment produce goods and services to the benefit of society. Some of these goods are traded in markets (e.g. energy).
